Compact Laboratory Balance KERN EWJ

Technical data

- Large LCD display, digit height 21 mm
- · Dimensions weighing surface, stainless steel
 - A Ø 80 mm
 - B Ø 120 mm
 - **©** Ø 135 mm, see larger picture
 - **D** W×D 155×145 mm
- · Permissible ambient temperature KERN EWJ: 15 °C/35 °C KERN EWJ-M: 15 °C/30 °C

· KERN EWJ/-H/-M: USB data interface for

- · Small draught shield as standard for models with weighing plate size A, B, removable, Weighing space W×D×H 134×128×80 mm
- 11 KERN EWJ 300-3H/EWJ 600-3: Large glass draught shield with 3 sliding doors for easy access to the items being weighed. Weighing space W×D×H 155×175×217 mm

transferring weighing data to the PC, printer etc.

· Protective working cover included with delivery

Accessories

- · Protective working cover, scope of delivery 5 items, KERN EWJ-A04S05
- · Internal rechargeable battery pack, operating time up to 57 h without backlight, charging time approx. 6,5 h, KERN EWJ-A06
- · KERN EWJ/-H/-M: Software BalanceConnection, for flexible recording or transmission of measured values, in particular also to Microsoft® Excel or Access as well as transfer of this data to other Apps and programs, for more details see internet, scope of supplies: 1 CD, 1 license, KERN SCD-4.0
- · Further details, plenty of further accessories and suitable printers see Accessories

still available

Features

large weighing ranges

own key on the keypad

adjustment, verification optional

• NEW: EWJ 600-3/EWJ 6000-2: The measuring

• **NEW**: Weighing with tolerance range (check-

weighing): a visual and audible signal helps

with portioning, dispensing or grading

· Standardised, convenient KERN concept of

operation: All primary functions have their

· Automatic internal adjustment, time-controlled

makes the balance independent of its location

· Capacity display: A bargraph display lights up

to show how much of the weighing range is

every 2 h, guarantees high degree of accuracy and

system's exceptionally high resolution of 600.000

points ensures the highest level of accuracy with

High-quality precision balance with automatic internal

Internal adjusting

Quick setting up of the balance's accuracy with internal adjusting weight (motordriven)

Adjusting program CAL

For quick setting up of the balance's accuracy. External adjusting weight required

EasyTouch

Suitable for the connection, data transmission and control through PC or tablet

Memory

Balance memory capacity, e.g. for article data, weighing data, tare weights, PLU etc.

Alibi memory

Secure, electronic archiving of weighing results, complying with the 2014/31/EU standard.

KERN Universal Port (KUP)

allows the connection of external KUP interface adapters, e.g. RS-232, RS-485, SB, Bluetooth, WIFI, Analogue, Ethernet etc. for the exchange of data and control commands, without installation effort

RS-232 Data interface

To connect the balance to a printer, PC or network

RS-485 Data interface

To connect the balance to a printer, PC or other peripherals. Suitable for data transfer over large distances. Network in bus topology is possible

USB Data interface

To connect the balance to a printer, PC or other peripherals

Bluetooth* Data interface

To transfer data from the balance to a printer, PC or other peripherals

WIFI Data interface

To transfer data from the balance to a printer, PC or other peripherals

Control outputs

(optocoupler, digital I/O) To connect relays, signal lamps, valves, etc.

Analogue interface

to connect a suitable peripheral device for analogue processing of the measurements

Interface for second balance

For direct connection of a second balance

Network interface

For connecting the scale to an Ethernet network

KERN Communication Protocol (KCP)

It is a standardized interface command set for KERN balances and other instruments, which allows retrieving and controlling all relevant parameters and functions of the device. KERN devices featuring KCP are thus easily integrated with computers, industrial controllers and other digital systems

GLP/ISO log intern

The balance displays weight, date and time, independent of a printer connection

GLP/ISO log Printer

With weight, date and time. Only with KERN printers.

Piece counting

Reference quantities selectable. Display can be switched from piece to weight

Recipe level A

The weights of the recipe ingredients can be added together and the total weight of the recipe can be printed out

Recipe level B

Internal memory for complete recipes with name and target value of the recipe ingredients. User guidance through display

Totalising level A

The weights of similar items can be added together and the total can be printed out

Percentage determination

Determining the deviation in % from the target value (100 %)

Weighing units

Can be switched to e.g. nonmetric units. See balance model. Please refer to KERN's website for more details

Weighing with tolerance range (Checkweighing)

Upper and lower limiting can be programmed individually, e.g. for sorting and dosing. The process is supported by an audible or visual signal, see the relevant model

Hold function

(Animal weighing program) When the weighing conditions are unstable, a stable weight is calculated as an average value

Protection against dust and water splashes IPxx

The type of protection is shown in the pictogram

Suspended weighing

Load support with hook

on the underside of the balance

Battery operation

Ready for battery operation. The battery type is specified for each device

Rechargeable battery pack

Rechargeable set

Universal plug-in power vlagus

with universal input and optional input socket adapters for A) EU, CH, GB B) EU, CH, GB, US C) EU, CH, GB, US, AUS

Plug-in power supply

230V/50Hz in standard version for EU, CH. On request GB, USA or AUS version available

Integrated power supply unit

Integrated in balance. 230V/50Hz standard EU. More standards e.g. GB, USA or AUS on request

Weighing principle Strain gauges

Electrical resistor on an elastic deforming body

Weighing principle Tuning fork

A resonating body is electromagnetically excited, causing it to oscillate

Weighing principle Electromagnetic force compensation

Coil inside a permanent magnet. For the most accurate weighings

Weighing principle Single cell technology

Advanced version of the force compensation principle with the highest level of precision

Conformity Assessment The time required for conformity assessment is specified in the pictogram

M

DAkkS calibration possible (DKD)

. The time required for DAkkS calibration is shown in days in the pictogram

Factory calibration (ISO)

The time required for Factory calibration is shown in days in the pictogram

Package shipment

The time required for internal shipping preparations is shown in days in the pictogram

Pallet shipment

The time required for internal shipping preparations is shown in days in the pictogram
