

Cubis® II

The New Generation of Modular Premium Balances

Highlights

Superior weighing performance

Fast measurement time and accurate weighing results are guaranteed thanks to monolithic weighing system and built-in engineering solutions.

No more issues with charged samples

The glass draft shields coated with conductive layer prevents from outer electrostatic effects. The built-in ionizer at draft shield versions D and I effectively eliminates electrostatic charges from samples.

Cleaning process guidance

The cleaning QApp provides visual guidance, information about chemical compatibility as well as electronical tracking of these events and is now freely available in all Cubis® II MCA models.

Hardware upgradeability

Motorized draft shield function or built-in ionizer can be activated post-purchase for high-capacity and semi-micro balances. An automated inner draft shield is available as a click-in accessory.

Compliance and Data Integrity

The end-to-end data integrity, technical controls for 21 CFR Part 11 compliance, integrated audit-trail and state-of-the-art user management ensure laboratories can meet regulatory requirements. These features are directly available on the Cubis® II balances, without the need of additional software.

Balances Fleet Management

The Ingenix Suite is a flexible, open solution that works with or without an ELN/LIM system. It offers unlimited connections to easily manage the entire Cubis® II MCA lab balance fleet across all labs within the same network.

Ease of use

The teaching function with learning capability of the motorized draft shield, guided workflows for various weighing applications (QApps), automated motorized leveling and automatic internal adjustment (isoCAL) help with easy and error-free operation of the balance.

Example: Hardware Upgradeability

Motorized inner draft shield

Installation of Cubis® II high-capacity or semi-micro balances in a workbench or laminar hood with filtered air flow subjects the instrument to drafty conditions. The motorized inner draft shield YDS125A ensures best weighing performances and ease of use even under drafty conditions.

Application Example: Pipette Check

Pipette calibration kits

Cubis® II balances with pipette calibration kit VF988, YCP04MS or YCP07MC and software application Pipette Check Advanced (QAPP005) are a complete solution to test Pipettes according to DIN EN ISO 8655.

Product Information

The Cubis® II premium laboratory balances with a maximum load range between 2.1 g and 70 kg and a readability between 0.1 µg to 1 g provide an ideal solution for every laboratory weighing application. Because these balances are modular the display, the weighing module, the draft shield and the software QApps can be individually configured offering a flexible solution for individual needs.
